**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

1 An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr Steven Fischman on 30 March 2005.

Amend claim 3 as follows:

"A method for self-testing, allocating and repairing a Random Access Memory (RAM) using a spare data column and spare rows, comprising:

performing first and second passes of self-test on the RAM memory;

in the first pass of self-test, determining a worst failing column of the RAM memory by testing one data column at a time while counting the number of unique failing row addresses of the tested data column by masking all data columns except the tested data column, such that only the un-masked tested data column [can produce] produces an error in a data-out comparator;

after completion of the first pass of self-test, allocating the spare column to replace the worst failing column;

in the second pass of self-test, determining unique failing row addresses in the memory;

after completion of the second pass of self-test, allocating the spare rows to replace the failing rows.

***Response to Amendment***

2 Applicant amendment overcomes §102(e) rejection of claims 3-10 and 14-16 and the rejection is withdrawn.

***Allowable Subject Matter***

3 The following is an examiner's statement of reasons for allowance:

Claim 3 recites, in part, "in the first pass of self-test, determining a worst failing column of the RAM memory by testing one data column at a time while counting the number of unique failing row addresses of the tested data column by masking all data columns except the tested data column, such that only the un-masked tested data column produces an error in a data-out comparator". This feature in combination with the remaining claimed structure avoids the prior art of record.

It is these limitations, which are not found, taught or suggested in the prior art of record, and are recited in the claimed combination that makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
